

Managing Impairments Using FM Global's Red Tag Permit System

Skill Level

Basic

Course Description

Managing Impairments Using FM Global's Red Tag Permit System is a free interactive tutorial available exclusively to FM Global clients that teaches participants about impairments to fire protection equipment/systems and how to use FM Global's Red Tag Permit System to properly manage those impairments. The course takes less than one hour to complete, and is currently available in English, French, and German.

Target Audience

- Facility managers
- Maintenance managers
- Maintenance personnel

Upon completion of this course, you should be able to:

- The importance of managing impairments to fire protection systems/equipment
- How an impairment is defined
- The reasons impairments occur
- The three phases of the impairment process
- The benefits of FM Global's Red Tag Permit System
- The components of FM Global's Red Tag Permit System
- The steps to take before, during and after an impairment
- The three main forms of temporary protection
- How to conduct a 2-in. (50-mm) drain test and how to interpret the varying conditions that may occur during testing
