E-Mail: bad.soden@h-hotels.de

An informative, one-day, basic level seminar

Ensuring Effective Sprinkler Installations: Foundations of Automatic Sprinkler Systems will address basic aspects of design and installation of sprinkler systems in accordance with the latest FM Global Property Loss Prevention Data Sheets.

If you are a professional involved in the design and installation of sprinkler systems, but have not had the opportunity to work with FM Global standards, this seminar will provide the necessary basic knowledge and prepare you to attend the following advanced level seminars:

- Designing Automatic Sprinkler Systems to FM Global Standards
- Installing Automatic Sprinkler Systems to FM Global Standards

The seminar includes interactive workshops, discussions and presentations.

What you will learn:

- How the combustibility of a storage or non-storage area is determined and classified.
- What the key components of automatic sprinkler systems are, including fire pump and water supply installations.
- How to correctly design the layout for sprinkler pipework and to specify the correct sizing and installation requirements.
- How to complete the FM Global hydraulic analysis form 999C.
- How to use the FM Approval guide to select FM Approved components available in the local market.

Who should attend?

This seminar is aimed at anyone who is involved in design of sprinkler systems for installation to FM Global Standards, and anyone overseeing such projects.

Examples of roles the seminar is aimed at:

- Sprinkler contractors.
- Project managers or co-ordinators.
- Insurance broker technical surveyors.
- Anyone closely involved with new sprinkler installation projects at their facility.

Information on this and other seminars can be found at fmglobal.com/seminars.

*Advance booking is required.
Please enrol using form on reverse.*
