# Confined Space/High Angle Technical Rescue Seminar

August 7-11, 2017 (Monday - Friday)

Conducted at the FM Global Emergency Response Consultants Training Center in Rome, Georgia

## **Summary of Topics:**

This confined space/high angle technical rescue seminar focuses on industrial technical rescue operations where emergency response personnel may be faced with confined space and high angle rescue challenges. Attendees will be introduced to the confined space/high angle technical rescue environment and provided detailed hands-on training. Training topics will include an overview of skills and terminology commonly used during rescue operations; technical rescue equipment familiarization; hazard and risk assessment relative to rescue operations involving confined spaces and high angles; pre-planning site-specific rescue operations; an overview of confined space entry procedures; personal protective equipment for rescuers; atmospheric monitoring techniques; patient packaging techniques; constructing anchor systems; constructing mechanical advantage systems commonly used in the rescue environment; removing entrants from confined spaces using retrieval equipment under emergency conditions; and much more.

## **Who Should Attend:**

This seminar will benefit all technical rescue personnel. A combination of classroom and hands-on (field training) activities will provide valuable insight into the requirements, responsibilities, and challenges confronting industrial rescue personnel. Designed to inform and prepare those employees recently assigned rescue duties as well as provide challenging recurring practical skills training for rescue technicians with years of experience, this program clearly provides technical rescue training that is challenging, realistic, meaningful and produces measurable results. The practical skills (hands-on) exercises will build confidence, increase professionalism, and enhance safety for rescue team members at all levels.

## **Benefits of Attending:**

This seminar is a worthwhile investment for any size industrial facility. Attendees will be better prepared to direct and/or participate safely in industrial emergency response rescue operations. They will have a better understanding of hazards likely to be encountered by rescue personnel during confined space operations and the requirements placed on personnel assigned permit required confined space duties. Additionally, persons attending this type of training tend to share the loss control message with other workers having a positive impact on the site safety program. During this training, participants will be provided an opportunity to practice many of the skills listed in NFPA 1670 *Standard on Operations and Training for Technical Search and Rescue Incidents*, NFPA 1006 *Standard for Technical Rescue Personnel Professional Qualifications* and NFPA 1983 *Standard on Life Safety Rope and Equipment for Emergency Services*. As well as pertinent OSHA regulations such as 29 CFR 1910.146 *Permit-required confined spaces*, 29 CFR 1910.134 *Respiratory Protection*.

## Personal Protective Equipment

FM Global ERC will provide all of the necessary equipment needed to perform field activities during this seminar.

Those participating in hands-on training activities must be physically and psychologically capable of wearing personal protective equipment to include self-contained breathing apparatus (SCBA) and be able to maintain a proper face-to-facepiece seal. Attendees with obstructions which may prevent a proper seal (e.g. facial hair, etc.) will not be allowed to participate in activities requiring the use of this equipment. Each company/facility is responsible for ensuring that their employees attending this seminar and taking part in the hands-on activities are capable of attaining a proper face-to-facepiece seal and participating in rigorous emergency response activities.

## Cost

\$995.00 per person

You may register online at the link provided below, or you may call our office to register over the phone at 706-291-1222. Payment should be received by FM Global ERC on or before Friday, July 21, 2017. Payments may be made by credit card, check or purchase order payable to FM Global Emergency Response Consultants.

Registration Link: · <https://ercrescue0817.eventbrite.com>

In order to allow time for active individual participation in all phases of this seminar, enrollment will be limited. Registration will be accepted on a first come, first served basis. Therefore, we emphasize that you should **RESERVE YOUR SPACE AS SOON AS POSSIBLE** in order to ensure your confirmed registration.

You will need hotel accommodations for the nights of August 6, 7, 8, 9 and 10, 2017. If you need assistance with lodging, please give us a call at our office and we will be happy to help you.
